

# Jobs of the Future

- Students work in a group or individually
- The teacher (or another student) reads out a job and the student / group has to guess whether the job opportunities will go up or down in the future (by 2023)
- They could stand up or stay seated to indicate the change or use pre prepared cards i.e. red / green
- The teacher then reveals the answer by using the Careerpilot Job Sectors to show the change—you can search for the job in the search box
- 1 point is scored for each correct guess & the winning team / individual is the one with the most points

Extension: Students could use [www.careerpilot.org.uk](http://www.careerpilot.org.uk) to research the jobs that they are interested in or find the one that has the highest salary. This task could also lead to a discussion about the potential changes that could affect available jobs in the future.

## Examples of suggested jobs:
